Description

The process infrared thermometer IRtec RAYOMATIC 20 measures temperatures up to 2000°C according to the different models. Compact, rugged and reliable, various optics offering different spectral responses can be mounted, which meets the requirements of a large number of standard and specialized applications.

IRtec RAYOMATIC 20 have a 2-wire 4-20 mA linear output. They can be used as a transmitter and can be easily connected to any standard indicator, data acquisition system or control panel.

Two rotary switches are included for setting emissivity manually from 0.30 to 1.00.

An optional integrated laser pointer system facilitates the identification of the measured surface area.

Applications:

IRtec RAYOMATIC 20 series is suitable for a wide range of manufacturing and processing industry applications: ferrous and non-ferrous metals, glass, minerals, ceramics, chemicals, electronics and research and development.

Key features:

- 4-20 mA linear output
- Manually adjustable emissivity
- Advanced signal processing: Emissivity, peak-picker, valley-picker, peak hold, valley hold and averaging
- Optional laser pointing system
